The Final Answer

- **Most** consumers have heard of brands that have a history they trust.
  - **Consumers** are increasingly becoming more skeptical. This leads companies to believe consumers are suspicious of their claims.
  - **Consumers** are tired of being sold to. They expect companies to be transparent about their products.
  - **Big** brands are changing customer relationships to reflect this expectation.
  - **Small** brands can maintain a positive brand image through a transparent product description and clear how each item fits their vision.
  - **A** positive product description can help provide you greater success in a competitive sales environment.

The Spanish Almanac

- **Quality** describes an organization's ability to produce:
  - **Efficiency** measures output—the same amount produced;
  - The two often conflict—efficiency is usually measured by output & "cost reduction";
  - Efficiency is a short-term, historical trend that has proven more useful than quality;
  - There are **perpetual**, **continuous** processes used to produce completely different products;
  - The **process** is the system producing output or results;
  - **Process improvement** can be achieved.
